# POWER LUBRICATOR

## WIRE ROPE LUBRICATOR

### WHAT IT DOES:

THE **POWER LUBRICATOR** “AUTOMATES” THE LUBRICATION OF WIRE ROPE  
It injects the grease into the inner strands of the wire, lubricating the wire to the core.

### BENEFITS:

**SAFETY** – Reduces Risk of Failure Due to Hidden Wear and Corrosion.

**SAVES MONEY** – Significantly Extends the Life of the Rope – Stretches the Budget - Reduces Down Time and Labor Costs.

**SIMPLE TO USE** – Clamp over the wire. Draw the wire through the lubricator.

Power Lubricator in use on an offshore contractor's rig

## SIMPLE TO SET UP

Rig the wire rope lubricator in-line with the wire rope – typically near the winch drum – place the correct size insert into the housing - clamp around the wire - connect the grease supply line – start pumping the grease up and drawing the wire

## REQUIREMENTS

A source of 100 PSI compressed air - a grease pump and follower plate suitable for pails or kegs and the necessary high pressure hoses – two chain or rope stoppers with shackles

**GREASES RECOMMENDED** - The greases we recommend are our environmentally safe TS-210 SeaSafe Leg Dope & Cable Lube compounded with moly or our TS-65 MP Moly Grease

The **POWER LUBRICATOR** - The unit consists of three key components:

The hinged aluminum housing with a grease fitting, an interchangeable XNBR hard neoprene insert (top and bottom halves) sized to the rope diameter requiring lubrication, and designed to fit snugly into the housing, and matching brass guide plates.

Two units are offered: Our basic model SD-108 and our custom model MD-109

**SIZES:** Inserts are available for the following size wire rope: 1/4, 3/8, 7/16, 1/2, 9/16, 5/8, 3/4, 7/8, 1, 1-1/4, 1-3/8, 1-1/2, 1-5/8, 1-3/4\*, 1-7/8\* and 2\* inches

\* exclusively for our Model MD-109

The **POWER LUBRICATOR** has been used for a wide range of applications:

- Offshore drilling rigs and construction cranes
- Container and dockside cranes
- U.S. Navy and Coast Guard ships
- Geared bulk and break-bulk cargo ships
- High value stationary barges, from casino barges to floating power plants
